

TEMPUTRACK

— temperature management solution for direct-drive trucks and non-Thermo King refrigerated units —

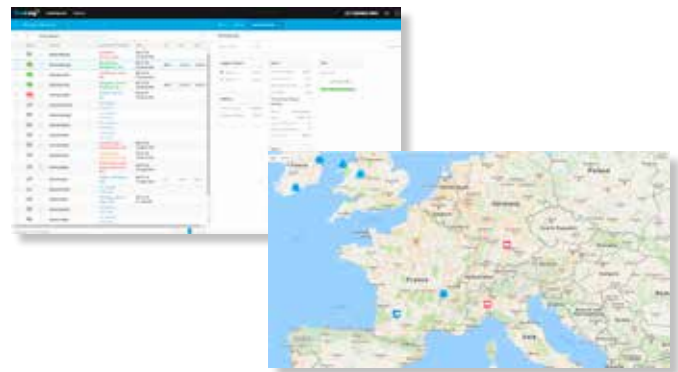

TempuTrak

Thermo King's simple temperature management solution for direct-drive trucks, heaters and non-Thermo King refrigerated units.

Our TempuTrak solution uses GPS-based telematics to provide real-time temperature monitoring—helping you keep track of your refrigerated assets and perishable cargo with enhanced reliability.

Product features

- Stand-alone tracking device
- Real-time temperature sensing
- Door openings monitoring
- Time and location tracking
- Geofencing
- Real-time alarms
- Online access 24/7
- Sophisticated reporting
- Easy plug and play installation
- Easily programmable over-the-air software with no disruptions to operations

TempuTrak boosts fleet performance

- Prevents cargo loss from spoiled goods, eliminating time spent resolving cargo loss or quality issues with the customer
- Boosts the utilisation of the truck or trailer fleet within just 30 days of implementation, reducing truck/trailer downtime
- Dramatically improves fleet visibility by keeping you aware of each truck or trailer's location
- Helps you improve and maintain high cargo safety standards
- Helps you plan deliveries and notify customers of arrival times

Competitive advantages

- ✓ **Cost-competitive:** TempuTrak offers a flexible, high-performance solution at a competitive price.
- ✓ **High visibility:** TempuTrak enables drivers, fleet managers and customers to proactively monitor the load in real time using the online portal, alarms or reports.
- ✓ **Flexible online monitoring** using the TracKing website.
